AENOR EN40

Large-radius truncated conical Pole , manufactured in a single piece from hot-dip galvanized S-235 JR steel. Total Pole height: 5 to 11 meters, with a Ø60 lateral fixing fitting. The base incorporates a reinforcing ring and 4 gussets, providing greater rigidity and stability. Continuous large-radius design with integrated, which provides a technical and discreet presence in the space.
Optional:
- For heights of 9 and 11 m, double is available at different heights.
– Anti-urine treatment at the base.
- Painted finish with a 2m base section finished in micro-textured black and the rest of the shaft in RAL9006 grey. Other RAL paint finishes are available to choose from.
