Materials:

The user will find inclusive games in every detail.

Structure, Mixed Extrusion: 90x90 mass-painted polymer posts with an extruded aluminum core. Pre-fixed staples in the correct position facilitate game assembly.

Slides : The sliding surface of the Slides is made of polished AISI304 stainless steel and is curved, wavy and molded in one piece.

Panels, HDPE: High-density polyethylene characterized by its resistance to chemical abrasions and its immunity to corrosion, being a polymer. Its elasticity and lightness provide high impact resistance, making it very difficult to break.

Platforms, Plastic: Flooring made of high-density polyethylene with a non-slip surface and holes for water drainage.

Screws: Electrical screws and made of 8.8 DIN267, AISI-304 stainless steel.

- None of the materials require special treatment for disposal.
- If the equipment is subject to severe use, the maintenance plan should be increased.
- Do not use the product before completing the installation/maintenance.
- Consult maintenance instructions.

Largest piece (mm): / Heaviest piece (kg):

IMPACT ZONE: Required safety surface. Floor covering according to **EN1176-1:2017** is recommended.
Spare parts availability: 10 years

Ground anchoring screws not included.
