Ischial support

Sena

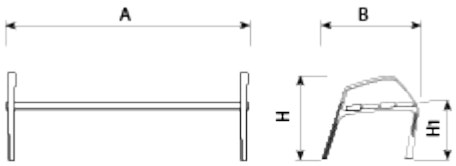

Grey cast iron | Hard wood | M10 bolts fixing

ISO 9001 | ISO 50001 | ISO 14001 | ISO 45001

Modern urban ischial support with a robust metal frame made of galvanized steel treated with the Ferrus process, a triple-layer protective coating for iron that guarantees optimal corrosion resistance, with a matte gray finish. It consists of two inverted U-shaped side legs with rounded corners and anchored to the ground with plates. The upper part features an inclined seat made of three natural tropical wood planks, treated with a triple-layer Lignus coating (fungicidal, insecticidal, and water-repellent). It includes stainless steel screws and is prepared for anchoring with M10 expansion bolts, depending on the surface and project. Minimalist and functional design, without a backrest, intended for short rests in public spaces.

Hardwood treated with LIGNUS: Wood from responsible forestry. Density greater than 930kg/m³, at 12% humidity, treated with a triple-layer LIGNUS coating, fungicide, insecticide, and water-repellent that provides protection against moisture penetration. Final finish with a layer of natural pigment in a satin finish, which provides additional protection against UV rays, the main cause of deterioration in this type of material.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
