Black forged iron

Inclusive Product

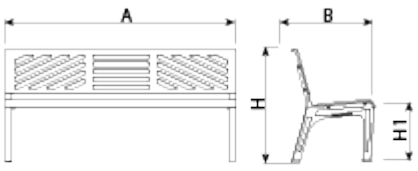

M10 bolts fixing

ISO 9001 ISO 50001 ISO 14001 ISO 45001

ESSEN designer Bench , total dimensions (length x height x depth) 1660 x 805 x 620 mm, made of galvanized steel (treated with the Ferrus process, the triple-layer protection for iron, which guarantees optimal corrosion resistance). Finished with epoxy primer and forged black polyester powder paint. Prepared for anchoring with M10 expansion bolts depending on the surface and project.
Optional items not included: Customizable marking with 74x35 mm aluminum plate.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.

Steel with a hot-dip galvanizing treatment to protect it from corrosion. Our galvanizing process complies with the UNE EN ISO 1461:2009 standard and involves immersion in a crucible of molten zinc at 450°C, during which a reaction occurs between zinc and steel resulting in different layers of alloy between the two metals, culminating in an external coating of pure zinc. To ensure proper application of the process, it is essential to subject the pieces to a preliminary process of degreasing, pickling, and fluxing.
