Set of 3 items designed to promote safe and sustainable play in Playground .

Roy 22 Climbing Set - Structure with circular cross-section Robinia wood posts, very strong and durable, with possible small natural cracks that do not affect its lifespan (up to 20 years). Includes vandal-proof braided steel ropes (Ø16 mm) coated in polypropylene, AISI-304 stainless steel metal parts, and electrostatic screws. Maximum dimensions 3200x180x180 mm, heaviest piece 74 kg.

Roybo Flat Swing and Cradle JROYC11000 - A natural-style Swing , crafted with Robinia wood posts for strength and a handcrafted character. It includes a flat seat and a cradle, with AISI-304 stainless steel metal parts and electrostatic screws. Designed to withstand intensive outdoor use, compliant with EN1176 standards.

Tap jroym13 Rocking Chair - Compact rocking chair with a durable and resistant Robinia wood frame. Includes AISI-304 stainless steel metal parts and safety screws. Maximum dimensions 950x220x220 mm, heaviest piece 22 kg.

All equipment is manufactured with resistant and sustainable materials (Robinia wood, stainless steel and galvanized steel), with long durability, maintenance-free and with spare parts available for 10 years.

Robinia Wood Posts: Circular cross-section posts made of Robinia wood. They are characterized by their strength and durability. Their trunks are formed entirely of heartwood, the hardest part of the tree. It is a living material, therefore small cracks may appear, which do not affect its lifespan, which can reach up to 20 years.

Nets, Vandal-resistant reinforced rope: Ø 16mm, 6 braided steel strands coated in polypropylene. Highly durable plastic connectors.

Metal parts: AISI-304 stainless steel.

Screws: Electrical screws and made of 8.8 DIN267, AISI-304 stainless steel.

- None of the materials require special treatment for disposal.
- **If the equipment is subject to severe use, the maintenance plan should be increased.**
- **Do not use the product before completing the installation/maintenance.**
- **Consult maintenance instructions.**

Largest piece (mm): / Heaviest piece (kg):

IMPACT ZONE: Required safety surface. Floor covering according to EN1176-1:2017 is recommended.

Spare parts availability: 10 years

As part of the natural process of wood, cracks may occur as a result of drying or surface tension, which do not negatively affect the quality or lifespan.
